## 1. Manufacturing Audits

Our Manufacturing Audits offer a great degree of flexibility and can be customized to fit your specific requirements:

- Factory profile, company financial evaluation.
- Audit of suppliers' evaluations and sourcing process.
- Audit of working conditions: social and safety conditions for workers.
- Audit of safety policy: Fire prevention, evacuation plan, chemical hazard, safety in workshops.
- Audit of workers qualifications: Training process, certifications for the work assigned.
- Audit of facilities: Warehouses for supplies and end products, testing and QA facilities.
- Audit of workshops: Evaluate if the factory has the machines, tools and facilities required to produce the product ordered.
- Audit of standards and processes: Verification of the standards and processes followed by the factory, such as ISO9001, ISO3834, LRQA ISO/TS 16949, PPAP, APQP.
- Quality control of the product during the manufacturing process according to the standards and requirements defined by the customer.

**Specialties:** Heavy Machinery, Metal structures, Welding, Mechanics and Painting.
